

Matthew Mars Rachao

Calgary, AB | 403-605-8120 | matthewrachao@gmail.com

Professional Summary

Hardworking and reliable with hands-on experience in construction, manual labour, and IT infrastructure. Self-taught systems administrator who built and maintains a personal server rack running multiple Debian Linux systems, develops automation scripts, and provides technical support. Proven ability to take ownership, meet targets, and adapt quickly — whether on a job site or behind a terminal. Looking to bring a strong work ethic and genuine technical aptitude to a full-time role.

Education & Certifications

Self-Directed Technical Education2020 – Present

- Built and maintain a personal server rack running multiple Debian Linux systems
- Hands-on study in networking, server infrastructure, bash scripting, and software development
- Developed custom automation scripts and tools for personal and community use
